

# Beyond Energy Efficiency Conference

Building and Remodeling the Next Generation of Green Homes

May 18, 2017 | Zero Net Energy Center | San Leandro, California

The building industry is moving quickly beyond the standard practices on energy efficiency. Today's ultra-efficient homes produce as much energy as they consume. Build It Green's full-day conference will explore the emerging trends that are raising the bar and redefining "green":

- Zero Net Energy (ZNE) homes
- Connected/smart home technology
- Health and indoor air quality
- Advanced water conservation
- California code updates
- New professional certifications

## Learn the Latest Practices, Gain a Competitive Edge!

Join us as we bring together leading industry experts with hundreds of building and home professionals for a day of cutting-edge workshops, seminars, product demonstrations and certification trainings. You'll come away with practical knowledge to incorporate into your business immediately.
